Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Tabata U.S. Patent No. 6,324,001; Tabata discloses a stereo image display apparatus in which edge portions of a left eye and right eye image display area shaded off, however the apparatus of Tabata appears to disclose physical structure which is utilized to block and/or gradual reduce the transmission of light representing the edge portions of an image display area from reaching the user's eyes. In Tabata there does not appear to be any processing of the images themselves to make the edge regions shaded off. Also, the regions of Tabata which are to be shaded off merely comprise the edge regions of the image display area and do not include other regions of the images which may not include fused points corresponding to each other in the left and right regions.
